Explain:

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: In addition to providing information on its website regarding HAC handset models, Cricket sales personnel have been made aware of the HAC requirements and the HAC handsets offered by Cricket. Cricket makes HAC handsets available to customers for testing in its retail stores, as required by Section 20.19(c)(4)(i) of the FCC's rules.

Methodology for Functionality Levels

Cricket offers handsets with a wide range of features and capabilities, and at varying price points. Because Cricket is a Tier II carrier, however, the number of handsets that it offers is not large enough to justify marketing its handsets based on levels of functionality. For instance, unlike some Tier I carriers, Cricket does not currently offer handsets with WiFi capability, nor does it carry a wide range of PDAs or Smartphones. As demonstrated on Cricket's webpage describing its handset models, Cricket's HAC handsets cover a broad range of prices and functions, including multiple frequency bands, text messaging and data capabilities, as well as other features that may be desirable to customers with hearing disabilities or impairments. For purposes of this filing, Cricket classifies its handset models into three categories:

Good – includes basic calling and texting functions, mobile web access, GPS

Better – may also include camera phone, Bluetooth, mobile email, QWERTY keypad, multimedia messaging service

Best – may also include touchscreen, high-speed data, video
